

St. Margaret's Orthopaedic Unit

Theatre & Discharge Summary

Patient: Mohammed Iqbal Sheikh (Mr.)

Gender: M

Presenting Complaint / Diagnosis: Degenerative meniscal tear, right knee

Date of Theatre: 3rd July 2026

Operation Undertaken: Arthroscopic Partial Meniscectomy, Right Knee

Medicines on Discharge: Naproxen 250mg twice daily with food; Omeprazole 20mg once daily

Ongoing Management: Weight-bear as tolerated; physiotherapy referral sent; review in fracture clinic in 4 weeks if not settling.

Note: this record deliberately omits an explicit 'age' field -- a correct extractor should return null/not found for age here, not guess a number.
